

Houses of Hope
Helping People Find A Better Way To Live.

2009+10

ANNUAL REPORT

As we complete our 48th year of service we would like to provide the community, our clients, our donors and other stakeholders with information about our programs over the past fiscal year—July 1, 2009 – June 30, 2010.

programs

HALFWAY HOUSE

The Halfway House program provides services to adults whose lives are impacted by chronic chemical dependency, assisting them to integrate into the workforce, establish necessary support networks, maintain abstinence, improve self-esteem, and reach their highest potential for independence and personal responsibility.

SHORT-TERM RESIDENTIAL

Touchstone provides comprehensive residential treatment promoting recovery, wellness, and productive lifestyle changes for individuals with substance dependency issues and related problems. Touchstone is dedicated to assisting people who may be experiencing problems related to co-existing mental health problems. *Touchstone is a collaboration between Houses of Hope and CenterPointe.*

INTENSIVE CASE MANAGEMENT & EMERGENCY/CRISIS RESPONSE

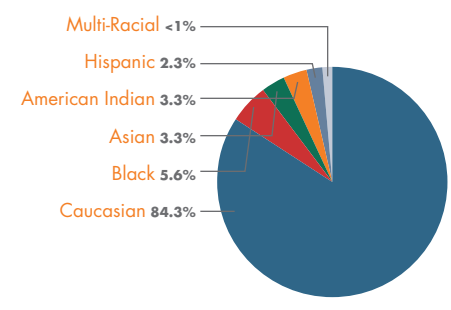

TASC Provides services to consumers in their home communities and environment. Services are targeted to help adult behavioral health consumers function more effectively in their everyday lives. This involves working with each individual and his/her support system to develop service goals that aide in improving overall quality of life. *TASC is a collaboration between Houses of Hope, Lutheran Family Services, Blue Valley Behavioral Health, Cornhusker Place and Region V Systems.*

our mission

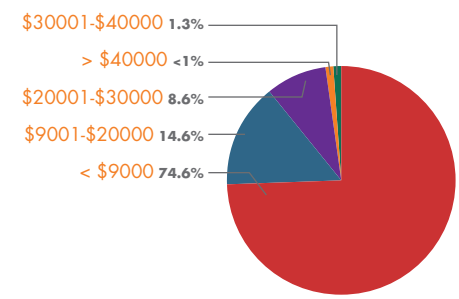

Houses of Hope provides affordable residential treatment and support services for individuals in recovery from substance dependence.

GENDER

*The Halfway House is gender-specific, male, and not factored into agency gender totals.

our history

Founded in 1962, Houses of Hope was the first halfway house facility in

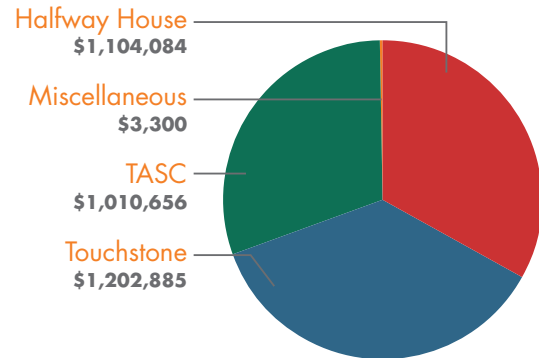

Nebraska. It originally opened to serve men who had completed treatment at the Hastings Regional Center in Lincoln. Since that time, Houses of Hope has provided continuous services to persons in recovery from chemical dependency, offering these individuals the opportunity for integration back into the community. Today, Houses of Hope offers the only licensed halfway house services in a 16-county area.

Over the years we have grown—In 1999, we opened Touchstone as a collaboration with CenterPointe. Due to demand and quality of services offered we have been able to expand services at Touchstone.

In 2004 we piloted a project for Region V Systems, Intensive Care Management, which has grown substantially since its humble beginnings—and is now the TASC program. TASC operates in collaboration with other partners (listed above) and has grown from serving 10 clients, to several hundred a year.

Houses of Hope is grateful for our good fortune and ability to respond to client needs over the decades we have been in business. We look forward to many more years!
